SUBJECT INDEX TO VOLUME 45

A Bubble Mechanistic Model for Subcooled Boiling Flow Predictions, 475

A Comparative Assessment within a Multigrid Environment of Segregated Pressure-Based Algorithms for Fluid Flow at All Speeds, 49

A Finite-Volume Method Based on Voronoi Discretization for Fluid Flow Problems, 319

A Fixed Grid Front-Tracking Model of the Growth of a Columnar Front and an Equiaxed Grain During Solidification of an Alloy, 395

A Four-Step Time Splitting Scheme for Convection-Diffusion Equation, 263

A New Algebraic Mass Flux Model for Simulating Turbulent Mixing in Swirling Flow, 283

A New Algorithm for Computing Binary Collisions in Dispersed Two-Phase Flows, 99

A New Approach of the Kalman Filter Using Future Temperature Measurements for Nonlinear Inverse Heat Conduction Problems, 565

A New Wall Function Strategy for Complex Turbulent Flows, 301

A Novel Segregated Algorithm for Incompressible Fluid Flow and Heat Transfer Problems–CLEAR (Coupled and Linked Equations Algorithm Revised) Part I: Mathematical Formulation and Solution Procedure, 1

A Novel Segregated Algorithm for Incompressible Fluid Flow and Heat Transfer Problems–CLEAR (Coupled and Linked Equations Algorithm Revised) Part II: Application Examples, 19

A Pseudo-Spectral Numerical Scheme for the Simulation of Steady and Oscillating Wall-Bounded Flows, 135

A Serial Solution for the 2-D Inverse Heat Conduction Problem for Estimating Multiple Heat Flux Components, 541

An Efficient Solution Scheme for Applying the Integral-Type Dynamic Localization Subgrid-Scale Model in Turbulence with Homogeneous Directions, 201

Computation of Turbulent Natural Convection in a Rectangular Cavity with the $k-\varepsilon-\bar{v}^2-f$ Model, 159

Efficiency and Accuracy of Higher-Order Boundary-Element Methods for Steady Convective Heat Diffusion, 109

Entropy Analysis and Improved Formulation of Electron Kinetic Theory Approach for Laser Short-Pulse Heating, 75

Finite Analytic Method Based on Power Series Expansion for Unsteady Heat Conduction Problems, 369

Finite-Volume and Finite-Element Hybrid Technique for the Calculation of Complex Heat Exchanges by Semiexplicit Method for Wall Temperature Linked Equations (Sewtle), 221

Fourth-Order, Conservative, Control-Volume Finite Differences for Boundary Cells, 449

Higher-Order Method for Solving Free Boundary-Value Problems, 385

Numerical Simulation of Coupled Heat and Mass Transfer in Hygroscopic Porous Materials Considering the Influence of Atmospheric Pressure, 249

Pressure-Based Algorithms for Multi-fluid Flow at all Speeds—Part I: Mass Conservation Formulation, 495

Pressure-Based Algorithms for Multi-fluid Flow at all Speeds—Part II: Geometric Conservation Formulation, 523

Simple, Accurate Treatment of Curved Boundaries with Dirichlet and Neumann Conditions, 421

The Performance of Geometric Conservation-Based Algorithms for Incompressible Multifluid Flow, 343

Transient Heat Transfer Analysis of Functionally Graded Materials Using Adaptive Precise Time Integration and Graded Finite Elements, 181
